[g-mail at ashishj2502@gmail.com](mailto:ashishj2502@gmail.com)

Insert an Image in program

$$a^2+b^2+2ab=(a+b)^2$$

$$\text{H}_2\text{SO}_4$$

$$a^2-b^2=(a-b)(a+b)$$

$$a^2+b^2=(a+b)^2-2ab$$

$$(a-b)^2=a^2-2ab+b^2$$

Step 2

Now, algebraic variables are assigned to each species in the unbalanced chemical equation.

ex:

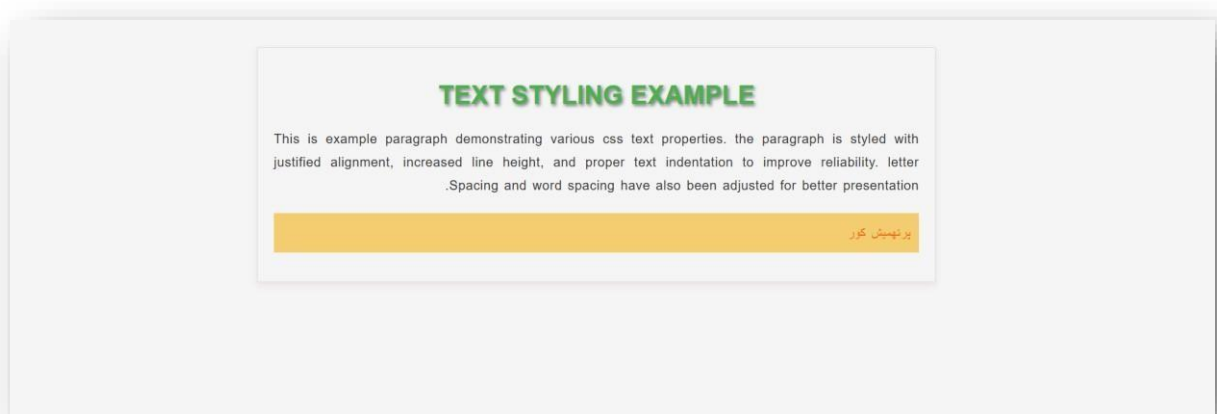

Use subscript and superscript in HTML

CSS

Making template in program using HTML and CSS

Using grid and wrap class to make number boxes

Inserting of image in the number boxes

Using bootstrap to make resume

Hobbies

Reading books
Technology and historical

About Me

Hello! I'm **Prathamesh Dhekane**, a passionate software developer with a strong foundation in computer science and a love for solving real-world problems with technology. I specialize in front-end development, machine learning, and AI technologies. I strive to build intuitive, user-friendly applications that enhance user experience.

With a degree in **Electronics and telecommunication** from SPPU University, I have developed proficiency in programming languages such as HTML, CSS, JavaScript, Python, and frameworks like React and Django. My projects include building AI-powered chatbots, web applications, and contributing to open-source initiatives.

When I'm not coding, I enjoy reading books on tech, playing video games, and exploring new innovations in the AI field.
